

## **Westin Strikes National, Solutions-Provider Agreement with GE Fanuc**

Westin Engineering, Inc. is pleased to announce that it has entered into a national Solutions Provider agreement with GE Fanuc Intelligent Platforms. This agreement covers all of Westin's offices and will further enhance and support Westin's considerable expertise in the application of GE Fanuc platforms for the water industry.

As a Consulting Engineer, it is important that Westin maintain its vendor independence but it is equally important that Westin maintain an in-depth knowledge of industry leading products applied in the water industry - this agreement supports both of those objectives.

GE Fanuc Intelligent Platforms, a unit of GE Enterprise Solutions, believes that strong partners like Westin will enable them to deliver high-performance solutions that help customers increase efficiency and effectiveness, and ultimately gain a sustainable advantage.

We welcome your inquiries about what we can do to help you achieve your goals. Please feel free to explore this site for more information on our expertise and GE Fanuc's water industry solutions, or contact me at [bill.serjeantson@we-inc.com](mailto:bill.serjeantson@we-inc.com).

– Bill Serjeantson, VP Engineering
